The Maths Forest is about helping teachers and kids to Talk, Think and Solve Maths. Students today need to be equipped to learn in a different way to their parents and as educators we need to facilitate that learning. My first blog post discusses Maths in 2020 and the importance of educating kids to become problem-solvers.

First up is an outdoor math activity. Outdoor learning as a concept is slowly beginning to catch on in North America and as of 2017 there were a little over 200 forest schools in the US, according to the Natural Start Alliance. (Learn more about the benefits of forest schooling in my post [What Is Forest School.](#))

Although Lucina Kathmann wrote *A Forest of Mathematics* for Middle School students, the text provides expert—and entertaining—instruction for myriad learners beyond the 7th and 8th grade levels. As an adult learner, I had some trepidation starting the book because it had been many years since I worked my way through a math text.

Location - these activities can take place in any forest alone or with the assistance of a forest guide. These activities offer an opportunity for key stage 1 and 2 pupils to do some practical and curriculum based learning while in a natural environment. Those mentioned above are only a small example of the possible activities.

*Forests and the National Curriculum - key stage 1 and 2 ...*

In order to maintain a suitable breadth of education during the GCSE years, we make the following subjects a compulsory part of the core curriculum studied by all GCSE pupils at Forest: Mathematics, English Language, English Literature, Science, either Double Award Science (a course combining study of all three sciences), or at least two separate science (Biology, Chemistry and Physics), at least one Modern Foreign Language (French, German or Spanish) and the Higher Project Qualification ...

Forest. A forest is an undirected graph in which any two vertices are connected by at most one path. Equivalently, a forest is an undirected acyclic graph. Equivalently, a forest is an undirected graph, all of whose connected components are trees; in other words, the graph consists of a disjoint union of trees. As special cases, the order-zero graph (a forest consisting of zero trees), a single tree, and an edgeless graph, are examples of forests.

*Tree (graph theory) - Wikipedia*

Math, especially in the early years, is about abstract thinking, sorting, comparing, categorizing and learning basic math vocabulary. This outdoor, forest-school inspired math activity is a perfect way to introduce math concepts in a way that is developmentally appropriate. The math activities for preschoolers in this post are inspired by the Swedish book *Play and Learn Mathematics Outdoors*, and revolve around collecting items in nature. Children are natural collectors and for this reason we ...
