An Anthropologist on Mars follows up on many of the themes Sacks explored in his 1985 book, The Man Who Mistook His Wife for a Hat, but here the essays are significantly longer and Sacks has more of an opportunity to discuss each subject with more depth and to explore historical case studies of patients with similar symptoms. In addition, Sacks studies his patients outside the hospital, often traveling considerable distances to interact with his subjects in their own environments.

Anthropologist On Mars Summary Study Guide

An Anthropologist on Mars is an engaging collection of seven neurological case studies that illustrate a supposed paradox - that what is perceived as disability or neurological deficit can result in amazing adaptations that make it a kind of gift. For example, a painter sustains a brain injury that makes him unable to see colour, and after a period of initial depression and disorientation, begins to appreciate his new way of seeing, and to reproduce it in black and white art.
