Justify your answer. (3 marks) 4 George and Jose are friends who play together after school. On fine days, they have a choice of playing computer games or going to the park. The probability that, on any fine day, they will prefer to play computer games is 0.8 for George and, independently, 0.7 for Jose. (a) (b)

### Exam Questions - Probability Pack B

To answer this one we need to go to the basic definition of a median. Median is the value which has roughly half the values before it and half the values after. The number of values less than 25 are (36+54+69 = 159) and the number of values greater than 30 are (55+43+25+22+17= 162). So the median should lie somewhere between 25 and 30.
