This section of the manual deals with an "ideal" scenario, in terms of the assignment of external computer peripherals to operate the X-Plane Baron B58 with the highest degree of realism. If you are missing some, or all of these external peripherals, you may elect to choose a different configuration that best suits your hardware.

The direct predecessor of the Baron was the Beechcraft 95 Travel Air, which incorporated the fuselage of the Bonanza and the tail control surfaces of the T-34 Mentor military trainer. To create the new airplane, the Travel Air's tail was replaced with that of the Beechcraft Debonair, the engine nacelles were streamlined, six-cylinder engines were added, and the aircraft's name was changed.
