Results from
occupational
epidemiology studies
have shown

increased risk of AA
associated with
pesticides and
benzene exposures
[64,65]. The higher
incidence among
working-age adults
suggests that
environmental or
occupational factors

Where To Download Case

may play a role in the development of AA [65–67]. A large-scale case-control study reported a higher proportion of AA patients exposed to pesticides, solvents, glues, paints, and fuel.
