This succinct, interdisciplinary introduction to critical reasoning successfully dares students to question their own assumptions and to enlarge their thinking world through the analysis of the most common problems associated with everyday reasoning. The text offers a unique and effective organization: Part I explains the fundamental concepts; Part II describes the most common barriers to critical thinking; Part III offers strategies for overcoming those barriers; Part IV offers a selection of contemporary issues that invite students to practice their skills.

This is the sixth volume of a detailed play-by-play catalog of drama written by English, Welsh, Irish, and Scottish authors during the 110 years between the English Reformation to the

English Revolution, covering every known play, extant and lost, including some which have never before been identified. It is based on a complete, systematic survey of the whole of this body of work, presented in chronological order. Each entry contains comprehensive information about a single play: its various titles, authorship, and date; a summary of its plot, list of its roles, and details of the human and geographical world in which the fictional action takes place; a list of its sources, narrative and verbal, and a summary of its formal characteristics; details of its staging requirements; and an account of its early stage and textual history.

The timely book takes stock of the state of the art and future of electronic democracy, exploring the history and potential of e-democracy in global perspective. Analysing the digital divide, the role of the internet as a tool for political mobilisation, internet Voting and Voting Advice Applications, and other phenomena, this volume critically engages with the hope for more transparency and political participation through e-democracy.
