This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining!

Lussier's: Human Relations in Organizations: Applications and Skill Building, 6e takes an application/skill building approach to human relations. This approach suits professors, who want to incorporate more activities and exercises into the classroom, and students who want to be able to do more than just understand concepts, but actually apply and develop skills that they can use in their daily and professional life. The book continues to have integration balanced by a three-pronged approach:--clear concise understanding of human relations/ organizational behavior concepts;-the application of HR/OB concepts for critical thinking in the business world; and-the development of HR/OB skills. This approach allows the student to learn the concept, apply it through various applications and situational activities, and ultimately apply it to his/her own life.
