This invaluable resource presents a balance of theory and application to help novices and practicing early childhood professionals understand why and how to design, arrange, and make changes to early childhood learning environments that help children achieve national and state standards through a play-based curriculum. Vivid contemporary photos of indoor and outdoor centers make reading this resource an enriching and aesthetically pleasing experience. The Second Edition of Julie Bullard's *Creating Environments for Learning: Birth to Age Eight* is a powerful resource for today's early childhood professionals that helps students learn the basic content and principles on environments and curriculum, and see environmental and curricular possibilities in practice--developmental and learning theories, current research, curriculum standards and outcomes, children's interests and their motivation to play, children's diversity, assessment of learning, and evaluation of the environment. It also contains a wealth of practical ideas and tips, lists of materials, and engaging vignettes and examples from the author's vast classroom experience. This new edition enhances students' understanding of curriculum by improving upon how curriculum is developed, and by teaching how to advocate and/or design a play-based curriculum, preparing them to use the latest research knowledge as they do so. Still organized by chapters on centers, this text helps pre-service and practicing teachers learn to create, maintain, and enrich indoor and outdoor learning environments to support children's development from birth to age 8. This is a must-have book for any college course or program that wants its teachers to know how to intentionally set up engaging and appropriately challenging early childhood learning environments and to understand the evidence and reasons for why they're doing it.

Author Julie Bullard has thoroughly revised *Creating Environments for Learning: Birth to Age 8*. The Second Edition continues to provide students with a highly visual, practical, interesting, and useful resource. Bullard's book enhances the student reader's level of understanding of learning environments, and features the most up-to-date information on research, curriculum standards, and play-based learning, with prime examples and 140 color photos that enhance the quality and practicality of the book. Covering birth through age eight, it provides a balance of theory and application to help novices and practicing early childhood professionals understand why and how to set up, arrange, and make changes to early childhood learning environments. *Creating a Learning Environment: Birth to Age 8, Second Edition*, an invaluable resource, assists students in designing environments that help children achieve national and state standards through a play-based curriculum. Through reading this book, students not only learn basic information on environments and curriculum, but also see environmental and curricular possibilities to broaden their horizons as an educator of the youngest of learners. Video-Enhanced Pearson eText. Included in this package is access to the new Video-Enhanced eText for *Creating Environments for Learning: Birth to Age Eight* exclusively from Pearson. The Video-Enhanced Pearson eText is: Engaging. Full-color online chapters include dynamic videos that show what course concepts look like in real classrooms, model good teaching practice, and expand upon chapter concepts. Over 43 video links, chosen by our authors and other subject-matter experts, are embedded right in context of the content you are reading Convenient. Enjoy instant online access from your computer or download the Pearson eText App to read on or offline on your iPad and Android tablets.* Interactive. Features include embedded video, note taking and sharing, highlighting and search. Affordable. Experience all these advantages of the Video-Enhanced eText along with all the benefits of print for 40% to 50% less than a print bound book. *The Pearson eText App is available for free on Google Play and in the App Store.* Requires Android OS 3.1 - 4, a 7" or 10" tablet or iPad iOS 5.0 or newer

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are

knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Make your everyday interactions with children intentional and purposeful with these steps: Be Present, Connect, and Extend Learning.
