The issue causing the loss of prime with my Volvo d12 looks to have been the lower fuel filter. While manually priming the truck I built enough pressure for fuel to spray out between the

fuel filter and the housing. When I removed the fuel filter, I observed the rubber gasket was "swollen", and not sitting in it's groove on top of the fuel filter.

I own a 2004 Volvo
with the Volvo D12
engine. I have @565K
and no problems as of
yet. The engine does

not have the pulling power of a cat or whatever but I knew this when I bought it. It does however get excellent fuel mileage and the motor is not quite as hard to work on as people think.
