Defense news from around the globe -- breaking news, in-depth coverage, analysis and commentary on national defense and international security

The Defense Post • Global defense news, analysis and opinion
The COVID-19 pandemic is an acute public health and economic crisis that is further destabilizing an already weakened rules-based international system. With cooperation, determination, and resolve, however, the United States and its allies can recover from the crisis and revitalize an adapted rules-based system to bring about decades of future freedom, peace, and prosperity.

DoD Discusses Drone Defense Strategy with Industry. The Department of Defense (DoD) discussed the need for an integrated approach in coping with this rising challenge at a virtual Industry Open House held with industry insiders on October 30.

The Brookings Institution has long produced an analysis of America's defense budgets and policies. The war on terror and the ongoing operations in Iraq and Afghanistan have forced upon this country soaring defense budgets and unprecedented challenges in policymaking. In the newest installment in this tradition, leading foreign policy expert Michael O'Hanlon offers policy recommendations for strengthening the ability of America's military to respond to international crises in a tumultuous world. The United States can, for the foreseeable future, be confident that its armed forces will remain engaged in Iraq, as well as in Afghanistan and other theaters in the war on terror. It will also need to remain involved in deterrence missions in the western Pacific, most notably in Korea and the Taiwan Strait. It will wish to remain engaged in European security, since the capabilities and cohesion of the NATO alliance have important implications for the United States globally. O'Hanlon reviews these priorities, asking tough questions and developing frameworks for answering them: • What military will the United States need in the future? • How much will it cost? • How can the U.S. increase the size of its ground forces without increasing the size of the defense budget? • In an era of apocalyptic terror threats, and at a time of \$400 billion defense budgets and \$400 billion federal budget deficits, how can this country protect its citizens while maintaining fiscal responsibility?

The years following September 11, 2001 have marked a turning point in Japan's defense strategy, marked by the erosion of normative and legal restraints. Utilizing poll data from Japanese newspapers as well as extensive interview material from Japanese and U.S. policymakers, Daniel Kliman argues that both Japanese elites and the general public increasingly view national security from a realpolitik perspective. This more aggressive view of national defense has led Japan to undertake a series of precedent-breaking initiatives, including the deployment of the Maritime Self-Defense Force, the introduction of a missile defense system, and the contribution of troops to U.S. efforts to rebuild Iraq.

Important assessment of U.S. post-Cold War defense and Clinton policy by 12 well-known experts.

Presents case studies of defense reform initiatives in more than twenty countries.

Although the West won the Cold War, the continuation of the status quo is not a foregone conclusion. The former Soviet-aligned regions outside of Russia -- Ukraine, Poland, Czech Republic, and others -- sit atop decaying armed forces while Russian behavior has grown more and more aggressive, as evidenced by its intervention in Ukraine in recent years. Thomas Young delves into the state of these defense institutions in Central and Eastern Europe, whose resources have declined at a faster rate than their Western neighbors' due to social and fiscal circumstances at home and shifting attitudes in the wider international community. With rigorous attention to the nuances of each region's politics and policies, he documents the status of reform of these armed forces and the role that Western nations have played since the Cold War, as well as identifying barriers to success and which management practices have been most effective in both Western and Eastern capitals. This is essential reading for undergraduates and graduates studying the recent history of Europe in the post-Soviet era, as well as those professionally involved in defense governance in the region.
