Diy Guide Timingbelt Replacement On Pd

Your timing belt should be replaced every 50,000 – 70,000 miles, depending on your car's make and model. Also, make sure you understand if your engine is an interference engine or a non-interference engine. In an interference engine, the valves and piston share the same airspace and the timing belt keeps them from touching. This is why you'll have a major engine failure on your hands if the belt breaks or skips.

How to Know When to Replace Your Timing Belt

17. Do the same for the small timing belt. 18. At this point it is worth replacing both belt tensioners and the water pump. The water pump I took off had a plastic impeller whereas the replacement (Audi genuine part) had a steel impeller. The water pump is held on by 2 bolts and is straightforward to replace.

Timing Belt - Timing Belt Information & Guide

One tricky thing was installing and setting the tension on timing belt tensioner. its done by tightening the bolt that holds it just a little bit maybe around 5ftlb and then using allen key turn the tensioner so the needle gets in between to marks. Once you see the tensioner this will make perfect sense.

Timing Belt replacement steps (updated) by ... - DIY Auto

Replacing your timing belt requires a few new pieces of kit: the belt itself, tensioners and pulleys, drive belts, seals, and usually a water pump/coolant. These parts work together closely, and generally wear to one part will equally affect the other. The exact cost of timing belt replacement depends on your car brand and model.
