

### Higher Regulators Algebraic K Theory And Zeta Functions Of Elliptic Curves Crm Monograph

This is likewise one of the factors by obtaining the soft documents of this **higher regulators algebraic k theory and zeta functions of elliptic curves crm monograph** by online. You might not require more times to spend to go to the book initiation as without difficulty as search for them. In some cases, you likewise accomplish not discover the message higher regulators algebraic k theory and zeta functions of elliptic curves crm monograph that you are looking for. It will unconditionally squander the time.

However below, next you visit this web page, it will be suitably categorically easy to get as capably as download guide higher regulators algebraic k theory and zeta functions of elliptic curves crm monograph

It will not take on many time as we tell before. You can reach it even though con something else at home and even in your workplace. correspondingly easy! So, are you question? Just exercise just what we provide below as without difficulty as evaluation **higher regulators algebraic k theory and zeta functions of elliptic curves crm monograph** what you bearing in mind to read!

Higher Regulators, Algebraic K-theory and Zeta Functions ...

A "higher" regulator refers to a construction for a function on an algebraic K-group with index  $n > 1$  that plays the same role as the classical regulator does for the group of units, which is a group  $K_1$ . A theory of such regulators has been in development, with work of Armand Borel and others. Such higher regulators play a role, for example, in the Beilinson conjectures, and are expected to occur in evaluations of certain L-functions at integer values of the argument. See also Beilinson ...

Higher Regulators, Algebraic  $SK_2$ -Theory, and Zeta ...

Abstract We present an introduction (with a few proofs) to higher algebraic K-theory of schemes based on the work of Quillen, Waldhausen, Thomason and others. Our emphasis is on the application of triangulated category methods in algebraic K-theory. 1 Introduction These are the expanded notes for a course taught by the author at the Sedano Winter School

Higher Algebraic K-Theory (After Quillen, Thomason and Others)

Algebraic K-groups are used in conjectures on special values of L-functions and the formulation of a non-commutative main conjecture of Iwasawa theory and in construction of higher regulators. [69] Parshin's conjecture concerns the higher algebraic K -groups for smooth varieties over finite fields, and states that in this case the groups vanish up to torsion.

Algebraic K-theory - Wikipedia

Higher Regulators, Algebraic  $SK_2$ -Theory, and Zeta Functions of Elliptic Curves: Bloch, Spencer J.: Amazon.sg: Books

Higher Regulators, Algebraic  $SK_2$ -Theory, and Zeta ...

In the context of arithmetic geometry a higher regulator, or just regulator for short, is a homomorphism from algebraic K-theory to a suitable ordinary cohomology theory. (It makes sense to think that it "regulates" cocycles in algebraic K-theory , which tend to be hard to analyze, to become cocycles in ordinary cohomology, about which typically more may be said.)
