Indoor Plants: The Essential Guide to Choosing and Caring ...

We'd recommend that beginners choose from the following indoor plants: Aloe. Aloe is a sturdy houseplant that doesn't need to be watered too often—once a fortnight is sufficient. As this is a desert plant, too much moisture will cause the roots to rot so you should only water it when the soil has completely dried out.

Essential guide to keeping indoor plants alive / Original ...

Most houseplants require bright filtered light. Light levels decrease rapidly as plants are placed further back from the window. It is important to avoid sun through glass as this can scorch the leaves of tropical plants. As light levels fall in the winter some plants may benefit from being moved to a lighter position such as nearer a window as long as the minimum required temperatures can be maintained.
