With contributors from Massachusetts General Hospital and Harvard Medical School, the unique and thorough Anesthesia Review: 1000 Questions and Answers to Blast the BASICS and Ace the ADVANCED covers both BASIC or ADVANCED levels of Anesthesiology training in a single volume. Any resident in Anesthesiology will find a gold mine of material—including topic-specific chapters with exam-like questions, answers with explanations, and references for further, in-depth review—for fast, efficient preparation.

Practice Single Best Answer Questions for the Final FRCA: A Revision Guide covers the complete syllabus of this new-style exam. The book includes 10 papers, each of which consists of 30 questions on clinical anaesthesia, intensive care medicine and pain management. Each practice paper matches the style, number and level of questions that candidates will face in their FRCA exam. Written by a group of anaesthetists experienced in teaching clinical anaesthesia and preparing trainees for their exams, every question is supplemented with a thorough explanation, incorporating the latest research and guidelines, and further reading suggestions. The book also includes guidance on how to go about answering single best answer questions. Pitched at just the right level for the exam, Practice Single Best Answer Questions for the Final FRCA: A Revision Guide is an essential resource for all Final FRCA candidates.

Prepare for success on in-training, certifying, and recertification exams! Anesthesia Review: Blasting the Boards is a high-yield study guide designed to maximize your study time and help you ace the written boards. A full-color, outline format features bulleted lists and numerous diagrams to facilitate quick memorization and information retrieval. It ' s an ideal review resource for residents, CRNAs preparing for certification, and practitioners who need to recertify.

This short textbook presents sixty cases with the detail and patient-specific data encountered in actual clinical practice. Cases cover the major points emphasized in the in-training exam and in written and oral boards. The cases are rigorously developed using two models. The Developed Case model features a step-by-step format that highlights the decisions made at each step. The Case Reflection model features a short narrative, followed by analysis of how the management and outcome might have been improved. Cases are referenced with current articles in support of particular strategies. Each case includes a boxed Key Points section and self-assessment questions.

Covering all four critical care board exams (anesthesiology, surgery, internal medicine, and neurology), Critical Care Medicine Review: 1000 Questions and Answers prepares you for exam success as well as clinical practice in today ' s ICU. This full-color, easy-to-use review tool provides challenging case studies, relevant images, multiple-choice board-style questions, rationales for correct and incorrect answers, and references for every question. Edited by instructors of anesthesia and critical care from Harvard Medical School and Massachusetts General Hospital, this comprehensive resource is an ideal study guide for critical care fellows, recertifying practitioners, and CCRNs.

A unique review reference featuring nearly 1,000 multiple choice questions. Each question focuses on a key concept or anesthesia problem encountered in daily practice. Answers, explanations, case analyses and references follow, making the information relevant to patient care and standard procedures.

This is a compact, single-source guide to regional anesthesia. Chapters are authored by regional anesthesia fellowship directors and fellows to insure maximum practicality and up-to-date coverage. Essentials of Regional Anesthesia covers all anatomical regions as well as the unique considerations in patients with chronic pain, obstetric patients, pediatric patients, and patients treated in the outpatient setting. A common chapter format makes it easy to find information quickly, and extensive illustrations enhance the text. Stay current with Essentials of Regional Anesthesia, and stay ahead with these helpful features: • Ultrasound incorporated into each block • Extremely practical focus • More than 400 Q & As to test knowledge • Authored by regional anesthesia fellowship directors and fellows • Clinical pearls and guidance on complications • Concise, clinically oriented review of relevant basic science • Common chapter format for ease of use • Well illustrated with 350 figures, nearly 200 in color

Divided into twelve sections that cover the entirety of anesthetic practice, this is a case-based, comprehensive review of anesthesiology that covers the basics of anesthetic management and reflects all new guidelines and recently developed standards of care. Each chapter of Anesthesiology: Clinical Case Reviews begins with a specific clinical problem or a clinical case scenario, followed by concise discussions of preoperative assessment, intraoperative management, and postoperative pain management. In addition to residents and fellows, this book is written for practicing anesthesiologists, student nurse anesthetists, and certified registered nurse anesthetists (CRNAs).
