Un autore bestseller. La vita di un genio celebrato e perseguitato. Un segreto che potrebbe cambiare la storia del mondo e dell'umanità. Per sempre.

A fictionalized story of a true-life genius that " reads . . . like one of John le Carr[é] ' s espionage novels " (New York Journal of Books). This account of the inner life of Nikola Tesla—arguably the most influential inventor in history—is a work of speculative fiction that reveals a genius whose greatest desire was to share his inventions with the world. It offers a compelling portrait of his passionate side, especially his secret love for his muse Karina, a woman no one else can see who brings him life-altering inspirations. Tesla ' s love and obsession with Karina are the forces driving his work and motivating him in the face of a doubting world. Tesla maintains a loner ' s life while working alongside some of the greatest financial and scientific powerhouses of the age, and faces constant temptation to stray from Karina and his life ' s work. This portrait of a larger-than-life genius brings to light his very human side. " Flacco does an admirable job of showing us a man who was sometimes the brilliant, prescient Master—the man with an eidetic memory—and sometimes the helpless dupe of lesser, venial men. . . . A beautifully crafted handling of a difficult—and not always sympathetic—subject. " —Historical Novel Society

The New York Times–bestselling author ' s ' haunting, compassionate, and terrifyingly true " story of a man breaking free from his notorious past (Gregg Olson, New York Times–bestselling author of Starvation Heights). From 1926 to 1928, Gordon Stewart Northcott committed at least twenty murders on a chicken ranch outside of Los Angeles. He held his nephew, Sanford Clark, captive there from the age of thirteen to fifteen. Sanford would be Northcott ' s sole surviving victim. Forced by Northcott to take part in the murders, he carried tremendous guilt all his life. Yet despite his youth and the trauma he endured, Sanford helped gain justice for the dead and their families by testifying at the trial that led to Northcott ' s execution. These shocking events inspired Clint Eastwood ' s film The Changeling. But in The Road Out of Hell, acclaimed crime writer Anthony Flacco uses revelatory new accounts from Sanford ' s son to tell the complete, true story. Going beyond the film ' s narrative, Flacco recounts not only Sanford ' s nightmarish captivity, but also the inspiring life he led afterward. In dramatizing one of the darkest cases in American crime, Flacco constructs a riveting psychological drama about how Sanford was able to detoxify himself from the evil he ' d encountered, offering the ultimately redemptive story of one man ' s remarkable ability to survive hell on earth and emerge intact.

An account of the aid worker co-author's dramatic January 2012 rescue from kidnappers in Somalia by members of a Navy SEAL Team Six unit offers insight into the effective use of targeted U.S. military missions.

As seen on Investigation Discovery: the story of killer husband and father Robert Peernock from the New York Times–bestselling author of Impossible Odds. Robert Peernock appeared to have the ideal life. Working as a pyrotechnics engineer and computer expert and coming home to his wife and daughter, Peernock projected the American dream. Even when he and his wife separated, it seemed amicable, just a small bump for the well-to-do family. But there was madness in his house: In private, Peernock was violent, subtly manipulative, and bordering on psychotic. But the horrifying details of his home life would only come to light after Peernock finally lost all control. Peernock had come home, brutally beat both his wife and daughter, force fed them alcohol, and deliberately sent them to their death behind the wheel, staging it to look like a drunk driving accident. He didn ' t foresee that his daughter would survive, and even with years of abuse, her attempted murder, and horrendous injuries, he never anticipated that she would speak so powerfully against him. Throughout his trial, Peernock claimed a massive government conspiracy against him. He hired and fired lawyers multiple times, deadlocking juries and spinning a web of lies. New York Times–bestselling author Anthony Flacco chronicles the sensational trial and all the terror that preceded it, looking deep into the mind of a deranged killer whose American dream was a waking nightmare for those trapped within it.

The astonishing story of a brave little girl from Afghanistan who not only survived horrific disfiguring burns, but was given a second chance at life. Tiny Dancer is the amazing true story of Zubaida Hasan, a nine-year-old girl from the remote deserts of Afghanistan, who, in the summer of 2001, accidentally fell into a kerosene fire while heating water for a bath. Though she was horribly mutilated, her father refused to give up and exhaustively sought help to save his child. When an American Green Beret soldier by chance sees Zubaida and her father on the street, he decides he must get involved. With assistance from many members of the US military, little Zubaida is given a second chance at life. She is flown to Los Angeles to begin a two-year journey through a series of surgeries performed by famed burn surgeon Dr. Peter Grossman. He and his wife, Rebecca, eventually take the child into their own home. This is a heartfelt and inspiring story of incredible courage equally matched by incredible kindness. " Flacco ' s depiction of Zubaida ' s culture shock is remarkable. [His] empathy and ability to tell Zubaida ' s story like he ' s inside her head makes for an engrossing feel-good read. " —Publishers Weekly " Interesting and affecting. . . . [A] genuinely moving story. " —Booklist

The autobiography of physicist and inventor Nikola Tesla was cobbled together from a series of articles the visionary released throughout his life. The book traces his triumphs from discovering the magnetic field to the invention of the coil and transformer named after him. Tesla also honestly discusses his breakdowns and obstacles, reminding us that being a genius isn't always easy.

Everybody knows that Thomas Edison devised electric light and domestic electricity supplies, that Guglielmo Marconi thought up radio and George Westinghouse built the world's first hydro-electric power station. Everybody knows these 'facts' but they are wrong. The man who dreamt up these things also invented, inter-alia, the fluorescent light, seismology, a worldwide data communications network and a mechanical laxative. His name was Nikola Tesla, a Serbian-American scientist, and his is without doubt this century's greatest unsung scientific hero. His life story is an extraordinary series of scientific triumphs followed by a catalog of personal disasters. Perpetually unlucky and exploited by everyone around him, credit for Tesla's work was appropriated by several of the West's most famous entrepreneurs: Edison, Westinghouse and Marconi among them. After his death, information about Tesla was deliberately suppressed by the FBI. Using Tesla's own writings, contemporary records, court transcripts and recently released FBI files, The Man who Invented the Twentieth Century pieces together for the first time the true extent of Tesla's scientific genius and tells the amazing tale of how his name came to be so widely forgotten. Nikola Tesla is the engineer who gave his name to the unit of magnetic flux. The Man Who Invented the Twentieth Century. Robert's biography of his childhood hero was launched at the 1999 Orkney Science Festival, where Robert gave a talk on Tesla in conjunction with Andrej Detela from the Department of Low and Medium Energy Physics at the Jozef Stefan Institute in Ljubjana, Slovenia. Reviews Robert Gaitskell, a vice-president of the Institution of Electrical Engineers, writing in the Times Higher Education Supplement, said: "Robert Lomas is to be congratulated on an easy-to-read life of a tortured genius. The book not only takes takes us through the roller-coaster fortunes of Tesla, but also has well-constructed chapters on the history of electrical research and on lightning. Although dealing at times, with difficult technical concepts, it never succumbs to jargon and remains intelligible to the informed lay-person throughout. Every scientist or engineer would enjoy this tale of errant brilliance, and a younger student would be enthused towards a research career." Angus Clarke, writing in the Times Metro Magazine said: "Nikola Tesla is the forgotten genius of electricity. He invented or laid the groundwork for many things we take for granted today including alternating current, radio, fax and e-mail. A Croatian immigrant to America in 1884 Tesla combined genius with gaping character flaws and an uncanny ability to be ripped off by everyone. This is scientific popularisation at its most readable." Engineering and Technology Magazine said: "This book is fun, which is not something one often says about engineering books...Tesla is most widely known for the magnetic unit that bears his name, but sadly little else. This book is a thoroughly entertaining way of correcting that injustice, a must for engineers, especially electrical ones."
