Management Accounting For Decision
Makers

Management Accounting for Decision Makers is a well balanced book that will illustrate the many complexities and advantages of understanding cost and performance accounting and management. This was the textbook for my masters' course on Management Accounting, and I found it to be well balanced between the technical, detailed complexities of management information systems and the general managerial perspective.

In management accounting, the approach to decision-making is basically quantitative. Management accounting deals with those decisions that require quantitative data. In a technical sense, management accounting consists of mathematical techniques or decision models that assist management in making quantitative type decisions.
