Covers lifeguarding responsibilities along with information on such topics as rescue breathing, CRP and AED, supplemental oxygen support, spinal injury management, handling risks, and professionalism.

The WHO Global report on drowning: preventing a leading killer highlights that 372,000 people drown worldwide each year. Drowning is among the ten leading causes of death for children and young people in every region of the world. The report sets out the evidence showing a range of effective drowning prevention strategies, and makes a number of recommendations for concrete measures to be taken by national and local governments. With the release of this report, WHO aims to galvanize attention and action to this issue by highlighting how collaboration across sectors can save lives.--Publisher description.

This practical guide provides a focus on the implementation of healthcare simulation operations, as well as the type of professional staff required for developing effective programs in this field. Though there is no single avenue in which a person pursues the career of a healthcare simulation technology specialist (HSTS), this book outlines the extensive knowledge and variety of skills one must cultivate to be effective in this role. This book begins with an introduction to healthcare simulation, including personnel, curriculum, and physical space. Subsequent chapters address eight knowledge/skill domains core to the essential aspects of an HSTS. To conclude, best practices and innovations are provided, and the benefits of developing a collaborative relationship with industry stakeholders are discussed. Expertly written text throughout the book is supplemented with dozens of high-quality color illustrations, photographs, and tables. Written and edited by leaders in the field, Comprehensive Healthcare Simulation: Operations, Technology, and Innovative Practice is optimized for a variety of learners, including healthcare educators, simulation directors, as well as those looking to pursue a career in simulation operations as healthcare simulation technology specialists.

From nineteenth-century public baths to today's private backyard havens, swimming pools have long been a provocative symbol of American life. In this social and cultural history of swimming pools in the United States, Jeff Wiltse relates how, over the years, pools have served as asylums for the urban poor, leisure resorts for the masses, and private clubs for middle-class suburbanites. As sites of race riots, shrinking swimsuits, and conspicuous leisure, swimming pools reflect many of the tensions and transformations that have given rise to modern America.

Two creatures, the end result of experiments in genetic engineering and enhanced intelligence, escape from a government laboratory and bring either death and destruction or a touching new kind of love to those they encounter. Reprint.

President George W. Bush nominated Leslie H. Southwick in 2007 to the federal appeals court, Fifth Circuit, based in New Orleans. Initially, Southwick seemed a consensus nominee. Just days before his

hearing, though, a progressive advocacy group distributed the results of research it had conducted on opinions of the state court on which he had served for twelve years. Two opinions Southwick had signed off on but not written became the center of the debate over the next five months. One dealt with a racial slur by a state worker, the other with a child custody battle between a father and a bisexual mother. Apparent bipartisan agreement for a quick confirmation turned into a long set of battles in the Judiciary Committee, on the floor of the Senate, and in the media. In early August, Senator Dianne Feinstein completely surprised her committee colleagues by supporting Southwick. Hers was the one Democratic vote needed to move the nomination to the full Senate. Then in late October, by a two-vote margin, he received the votes needed to end a filibuster. Confirmation followed. Southwick recounts the four years he spent at the Department of Justice, the twelve years on a state court, and his military service in Iraq while deployed with a Mississippi National Guard Brigade. During the nomination inferno Southwick maintained a diary of the many events, the conversations and emails, the joys and despairs, and quite often, the prayers and sense of peace his faith gave him--his memoir bears significant spiritual content. Throughout the struggle, Southwick learned that perspective and growth are important to all of us when making decisions, and he grew to accept his critics, regardless of outcome. In *The Nominee* there is no rancor, and instead the book expresses the understanding that the difficult road to success was the most helpful one for him, both as a man and as a judge.

Instructs educators on using the CAFE system to develop student's reading skills and promote comprehension, including information on tracking growth and how to talk to students.

As the number of community pools and waterparks grows nationwide, participation in aquatic activities is also growing. Lifeguards must receive proper and effective training, and maintain their skills to ensure their ability to work effective with others as a part of a lifeguard team. This manual will supplement your in-service training to keep your knowledge and skills sharp.
