This book on internal combustion engines brings out few chapters on the research activities through the wide range of current engine issues. The first section groups combustion-related papers including all research areas from fuel delivery to exhaust emission phenomena. The second one deals with various problems on engine design, modeling, manufacturing, control and testing. Such structure should improve legibility of the book and helps to integrate all singular chapters as a logical whole.

Die Analyse eines Verkehrsunfalls erfordert zusätzliches Wissen, das im Normalfall nicht

während des Studiums vermittelt wird. Daher wird die Analyse von Verkehrsunfällen in der Regel von spezialisierten Sachverständigen vorgenommen. Das dazu nötige Wissen wurde Anfang der 80er Jahre bereits in einer früheren Auflage dieses Handbuchs veröffentlicht. Das Autorenteam besteht aus Experten auf ihrem jeweiligen Gebiet und stellt die Arbeitsmittel in zeitgemäßer Darstellung bereit. Dabei werden computergestützte Arbeitsmethoden berücksichtigt. Die zweite Auflage des Buches wurde um einen Abschnitt über Leitplanken ergänzt. Neben den technischen Spezifikationen und der Projektierung fanden besonders die Bauarten für Motorradfahrer und die Testsimulation Beachtung.

Technology-based firms continue to compete primarily on innovation, and are continuously required to present new solutions to an exacting market. Innovation processes have progressively become interdisciplinary, collaborative, inter-organizational, and international, and a firm's ability to synthesize knowledge across disciplines, organizations, and geographical locations has a major influence on its viability and

success. This book demonstrates how knowledgeintegration is crucial in facilitating innovation within modern firms. It provides original, detailed empirical studies of prerequisites, mechanisms, and outcomes of knowledge integration processes on several organizational levels, from key individuals, projects, and internal organizations, to collaboration between firms.
