of the debt. What he calls the stroke of genius of Christianity (Geniestreich des Christentums) is that God sacrifices himself, condemns himself to death; he sacrifices himself in the person of his son to redeem man, to pay the debt or the guilt of man and the sinner, who is a debtor. That is the ultimate meaning, the unbelievable meaning of the Incarnation and the Passion.

The executive editor of Sports Illustrated offers an in-depth analysis and behind-the-scenes look at the historic 2008 match between tennis titans. In the 2008 Wimbledon men's final, Centre Court was a stage set worthy of Shakespearean drama. Five-time champion Roger Federer was on track to take his rightful place as the most dominant player in the history of the game. He just needed to cling to his trajectory. So, in the last few moments of daylight, Centre Court witnessed a coronation. Only it wasn't a crowning for the Swiss heir apparent but for a swashbuckling Spaniard. Twenty-two-year-old Rafael Nadal prevailed, in five sets, in what was, according to the author, "essentially a four-hour, forty-eight-minute infomercial for everything that is right about tennis—a festival of skill, accuracy, grace, strength, speed, endurance, determination, and sportsmanship." It was also the encapsulation of a fascinating rivalry, hard fought and of historic proportions. In the tradition of John McPhee's classic *Levels of the Game*, *Strokes of Genius* deconstructs this defining moment in sport, using that match as the backbone of a provocative, thoughtful, and entertaining look at the science, art, psychology, technology, strategy, and personality that go into a single tennis match. With vivid, intimate detail, Wertheim re-creates this epic battle in a book that is both a study of the mechanics and art of the game and the portrait of a rivalry as dramatic as that of Ali–Frazier, Palmer–Nicklaus, and McEnroe–Borg. "Deftly touches on all the defining factors of contemporary tennis." –San Francisco Chronicle "Illuminates a kingdom changing hands. An engrossing book." –Bud Collins

to make a record-breaking win, Rafael Nadal's ultimate triumph, and the ways in which the author believes the competition reflected optimal applications of skill, sportsmanship, and athletic science.

What could be better than diving into cool water on a hot day? In this enormously enjoyable and informative history of swimming, Eric Chaline sums up this most summery of moments with one phrase: pleasure beckons at the water's edge. *Strokes of Genius* traces the history of swimming from the first civilizations to its current worldwide popularity as a sport, fitness pastime, and leisure activity. Chaline explores swimming's role in ritual, early trade and manufacturing, warfare, and medicine, before describing its transformation in the early modern period into a leisure activity and a competitive sport—the necessary precursors that have made it the most common physical pastime in the developed world. The book celebrates the physicality and sensuality of swimming—attributes that Chaline argues could have contributed to the evolution of the human species. Swimming, like other disciplines that use repetitive movements to train the body and quiet the mind, is also a means of spiritual awakening—a personal journey of discovery. Swimming has attained the status of a cultural marker, denoting eroticism, leisure, endurance, adventure, exploration, and excellence. *Strokes of Genius* shows that there is not a single story of human swimming, but many currents that merge, diverge, and remerge. Chaline argues that swimming will become particularly important as we look toward a warmer future in which our survival may depend on our ability to adapt to life in an aquatic world.

Celebrating the best drawings by contemporary artists, the *Strokes of Genius* series follows the beautiful, ongoing story of contemporary drawing through the work and words of some of today's top artists. Focusing on the theme "Inspiring Subjects," this thoughtfully curated 10th edition features the artists' most compelling subject matter. Artists and art lovers alike are sure to be inspired by the resulting energy and expressiveness showcased on these pages.

- 127 modern-day masterpieces in charcoal, pencil, pastel, colored pencil, scratchboard, pen and ink, and more
- A breathtaking diversity of styles and approaches
- Comments from the artists offer fresh-from-the-studio advice, insights, and anecdotes not found anywhere else

Celebrates creative drawing with diverse pieces by today's best artists in charcoal, pencil, pastel, colored pencil, and scratchboard.

This account of a tennis match played by Arthur Ashe against Clark Graebner at Forest Hills in 1968 begins with the ball rising into the air for the initial serve and ends with the final point. McPhee provides a brilliant, stroke-by-stroke description while examining the backgrounds and attitudes which have molded the players' games.

Today Victor Trumper is, literally, a legend - revered for deeds lost in time, a hallowed name from the golden era from before the moving image began to dictate memories and Bradman reset the records. In life, Trumper was Australia's first world beater - at his peak just after Federation, he was not just a cricketer but an artist of the bat, the genius of a new era, a symbol of what Australia could be. Crowds flocked to his club matches, English supporters cheered him on in Tests, and at his early funeral in 1915 - even amidst the grief of war - mourners choked the streets of Sydney. Trumper lives on, not just as the name of a stand at the SCG, or a park near his former home ground. He lives in an image that captures him mid-stroke: a daring player's graceful advance into the unknown, alive with intent and controlled abandon. Reproduced countless times in cricket books and pavilions around the world, it conjures an era, an attitude - cricket's first imaginings of itself - and encapsulates the timeless beauty of sport like none other. If Trumper is a legend, George Beldam's 'Jumping Out' has become an icon. But that image has almost paradoxically obscured the story of its subject. Man and photograph have entranced Gideon Haigh since childhood, and in *Stroke of Genius* he explores both the real Victor Trumper and the process of his iconography. Together they inspired a profound moral and aesthetic revaluation of the game, and changed the way we think about cricket, art and Australia. In this inventive, fresh and compelling work of history, Haigh reveals how Trumper, and Beldam's incarnation of his brilliance, are at the intersection of sport and art, history and timelessness, reality and myth. 'Haigh, cricket-lover and polymath, couldn't write a dull book if he tried ... the book equally qualifies as art and social history.' The Saturday Paper 'Gripping ... Haigh draws on an encyclopaedic knowledge of cricketing fact and folklore ... [and] evokes an era retrospectively made golden.' The Times 'Bless all of Haigh, Beldham, Trumper and Penguin Books for combining so well here ... What Haigh has done so well in *Stroke of Genius* is not only intellectually restore this ubiquitous but little-understood photograph, but doff a skull cap in the direction of the man who at least equalled Trumper for brilliance in creating it. Here's to biting of more than you can chew.' The Guardian 'There are various claimants to the title of 'world's best cricket writer', yet no dispute about who today, is the best writer on cricket. This is the Australian, Gideon Haigh.' The Telegraph,

Calcutta 'In Stroke of Genius, Gideon Haigh has given Jumping Out and the men who created it the richly perceptive tribute they have always deserved.' The Age 'Stroke of Genius offers such numerous fresh perspectives about cricket that it is a stroke of genius itself.' Australian Book Review Stroke of Genius was shortlisted for the NSW Premier's History Awards 2017.
