We say that conflict is natural, inevitable, necessary, and normal, and that the problem is not the existence of conflict but how we handle it. But we are also loath to admit when we are in the midst of conflict. Parents assure their children that the ferocious argument the parents are having is not a conflict, just a "discussion."

Pondy's (1967, p. 298) seminal work epitomizes this definition, as he argues that "conflict" is composed of four parts: (1) antecedent conditions (those creating the possibility for disagreement between actors, like resource shortages); (2) emotions (what he calls "affective states," such as stress and hostility); (3) perceptions of the situation; and (4) behavior (e.g., overt coercive violence, such as militarized behavior).

Published almost ten years ago, The Dynamics of Conflict Resolution has become one of the seminal works in the conflict resolution field. Bridging the gap between highly theoretical tomes and a how-to, practical handbooks, the first edition became an immensely valuable and accessible resource for experienced and novice practitioners looking for a deeper yet practical view of conflict and how to deal with it. In this new edition, the basic vision and overall organization will be maintained. However, in keeping with current trends and research, chapters will be reviewed and revised to reflect four key concepts—interactional dynamics, system dynamics, culture and conflict, and conflict engagement. These concepts will inform the entire book. In addition, Bernie will specifically Add a new chapter on engaging conflict, which will incorporate some of Bernie's work from Beyond Neutrality and Staying with Conflict. Include the major work that has been done on culture, systems, and conflict engagement. Apply conflict concepts to new technologies, particularly online communication and conflict resolution efforts on the web. Incorporate some of the insights and approaches of narrative mediation into the communication and mediation chapters. Reference and include other significant writing that applies to conflict theory and to the practical work of conflict practitioners so that this book continues to be seen as a valuable teaching resource. Develop an instructors manual including PowerPoint slides, learning objectives and key concepts for each chapter, review questions, and sample syllabus for download. Proposed TOC for Second Edition Preface Part One - Conflict Chapter 1: The Nature of Conflict Chapter 2: How People Conflict Chapter 3: Power and Conflict Chapter 4: Culture and Conflict Part II - Resolution Chapter 5: Engaging Conflict Chapter 6: The Nature of Resolution Chapter 7: Communication: Chapter 8: Negotiation and Advocacy Chapter 9: The Road to Resolution: Overcoming Impasse Chapter 10: Mediation Chapter11: Other Approaches to Conflict Resolution Conclusion: Conflict Resolution in our Lives

This empowering guide goes beyond observable techniques to offer a close look at the creative internal processes--both cognitive and psychological--that successful mediators and other conflict resolvers draw upon.

The mechanisms of protest and revolution have been the subject of theoretical research for over a century, yet the lack of data has hindered the empirical validation of conflicting theories. In this book, the author presents a unique new set of sub-daily data from over thirty countries and seven civil wars and uses them to test two models of conflict, the predator-prey model and the competing species model. The dynamic nature of the data modelling and the novelty of the dataset make this work a unique contribution to the field of conflict research. Dynamics of Conflict will help to re-evaluate existing theories and chart a new course towards the formal and statistical modelling of conflict.

This volume presents an innovative new analytical framework for understanding the dynamics of violent conflict and its impact on people and communities living in contexts of violence. Bringing together the findings of MICROCON, an influential five year research programme funded by the European Commission, this book provides readers with the most current and comprehensive evidence available on violent conflict from a micro-level perspective. MICROCON was the largest programme on conflict analysis in Europe from 2007-2011, and its policy outreach has helped to influence EU development policy, and supported policy capacity in many conflict-affected countries. Whilst traditional studies into conflict have been through an international /regional lens with the state as the primary unit of analysis, the micro-level perspective offered by this volume places the individuals, households, groups and communities affected by conflict at the centre of analysis. Studying how people behave in groups and communities; and how they interact with the formal and informal institutions that manage local tensions, is crucial to understanding the conflict cycle. These micro-foundations therefore provide a more in-depth analysis of the causes and consequences of violent conflict. By challenging the ways we think about conflict, this book bridges the gap in evidence, allowing for more specific and accurate policy interventions for conflict resolution and development processes to help reduce poverty in the lives of those affected by conflict. This volume is divided into four parts. Part I introduces the conceptual framework of MICROCON. Part II focuses on individual and group motivations in conflict processes. Part III highlights the micro-level consequences of violent conflict. The final section of this volume focuses on policy implications and future research agenda.

The authors provide a comprehensive and original interpretation of the Northern Ireland conflict.

This monograph examines the tragic conflict in Thailand's southern Muslim-majority provinces near the border with Malaysia. Although the conflict has attracted wide national and international interest, no agreement exists on the cause of the resumption of violence in an area that had remained free of major conflict for two decades. This monograph critically examines explanations for the conflict and traces its evolution from the early 1990s to the beginning of the Samak government in 2008. The study points to a wide variety of factors that were important in the resumption of the conflict, with policies of Prime Minister Thaksin Shinawatra being critical in determining the timing and intensity of the violence. These conditions include: (1) the resumption of an age-old conflict between Malay Muslims from Pattani, Yala, and Narithiwat Provinces against a discriminatory central government; (2) entrenched problems of criminality in an area far from the capital and with a porous border with Malaysia; (3) the disbanding of important conflict resolution institutions by former Prime Minister Thaksin, who then gave priority to hard line (sometimes extrajudicial) security policies; (4) growing Islamic religiosity, influenced by regional reform movements and international developments, including the example of extremist movements such as Jemaah Islamiyah; and (5) the growth of southern insurgent movements—which have never issued public demands and whose real leaders remain unknown. In this complex setting, no resolution to the violence appears likely in the near future, as Thaksin's main policies have been retained since the September 2006 coup that ousted his government.

Resolving International Conflict rethinks the dynamics of conflict escalation and continuation by engaging with research from the wide range of subfields in this area. The book suggests a new framework for understanding conflict as a particular form of situation, interaction and tension. It shows how conflicts are shaped by varied dynamics relating to emotion, securitization, incentives, digital technology and violence; even attempts at monitoring, resolving or remembering conflicts may end up contributing to their escalation or continuation. Split into two sections, the first part focuses on the question of why and how conflicts escalate, while the second part analyses the continuation of conflict. The book features several case studies of conflict escalation and continuation - in Bahrain, Israel-Palestine, South Sudan, Northern Ireland and, most prominently, the case of the Syrian uprising and subsequent civil war. Throughout the book, and, in particular, in the conclusion, the consequences for conflict transformation are discussed. This work will be of much interest to students of conflict resolution, peace studies, war and conflict studies, security studies and international relations, in general.

Prisons are dangerous places, and assaults, threats, theft and verbal abuse are pervasive - attributable both to the characteristics of the captive population and to an institutional sub culture which promotes violence as a means of resolving conflicts. Yet the crimes perpetrated by prisoners on other prisoners have attracted little interest, and criminological research has contributed little to an understanding of situations in which violence arises in penal institutions. This book seeks to remedy this, and to address and answer a number of key questions: how do features of the prison social setting shape conflicts?; what social norms guide the decision to use violence?; what are the personal and social consequences of spending months or years in places where distrust and anxiety are normal?; how do staff respond to the dangers that are part of daily life in many prisons?; is it possible to identify factors associated with risk and resilience?; and what methods of handling conflicts do prisoners use that could prevent violence? Prison Violence adopts a distinctive approach to answering these questions, and is based on extensive research, including interviews with both victims and perpetrators of prison violence; it pioneers a conflict-centred approach, seeking to understand the pathways into and out of situations where there is potential for violence, focusing on interpersonal and institutional dynamics rather than on individual psychological factors.

Winner of the 2009 CPR Award for Outstanding Book In this groundbreaking book, Bernard Mayer, a pioneer in the field of conflict resolution, offers a new paradigm for dealing with long-term disputes. Mayer explains that when dealing with enduring conflict, mediators and other conflict resolution specialists need to move past the idea of how quickly they can resolve the conflict. Instead, they should focus on how they can help people prepare to engage with an issue over time. Once their attention is directed away from a speedy resolution to a long-term approach, new avenues of intervention become apparent.

This volume shows the importance for international security studies for better understanding the social dynamics of peace and conflict. It illustrates the crucial role that culture and symbols play in facilitating peace or fostering conflict and intended for anthropologists widely.
