The principle of use of science for rule of thumb is the starting point that distinguishes scientific management from traditional management. Under scientific management decisions are made on the basis of acts as developed by the application of scientific method to the problem concerned.

**Principles of Scientific Management**—6 Principles

Scientific management has at its heart four core principles that also apply to organizations today. They include the following: Look at each job or task scientifically to determine the " one best way " to perform the job. This is a change from the previous " rule of thumb " method where workers devised their own ways to do the job.
