weapons. The program allows users to compute the effectiveness of their weapons based on the initial release/firing condition for both AS and SS weapons. The effectiveness is determined by predicting the probability of success of damaging or incapacitating the target. The program also allows the calculation of the trajectory of unguided AS weapons

Weaponeering: An Introduction, Third Edition, Volume 1 covers the basic subjects that need to be understood to compute weapon effects based on the concept of an Effectiveness Index (EI). These subjects include weapon delivery accuracy, warhead lethality and target vulnerability. This approach gives reasonable, rapid results and allows an easier understanding of current methods used to estimate weapon effects.
