Wild & Furry Animals of the Southern Appalachian Mountains is an illustrated book by renowned artist Lee James Pantas that features his exquisite pen and ink drawings as well as basic scientific information and fun facts of all of the mammals, both large and small, that are likely to be encountered in the Southern Appalachians, as well as some of the rarest and least likely to be seen. The mountains, stretching from West Virginia to Alabama, are home to an amazing and diverse group of mammals, from the astonishing Star-Nosed Mole to the adorable Southern Flying Squirrel, from the mythical Black Bear to the playful River Otter. Wild & Furry Animals of the Southern Appalachian Mountains visits each one on a delightful journey of art and nature.

"Elisa Moore Baldwin provides an introduction that traces Jordan family history and describes economic, social, and political conditions during the period. Because few first-person accounts exist of the life of poor whites, this diary will be invaluable to students of southern and women's history; no comparable work exists for this part of Alabama during this era."--BOOK JACKET.

A handy, all-in-one photographic field guide to the wildlife of South Africa, this guide covers the region s mammals, birds, reptiles, frogs and trees most likely to be seen, with concise accounts and distribution maps for each species. A brief introduction discusses geology, climate, vegetation zones, wildlife hotspots, and tips on watching wildlife."

A field guide to the wildlife of southern Africa, describing over 2,000 plants and animals, with accurate illustrations in full colour. This book has been a trusted fi eld companion for many years. Comprehensively updated, it now features range maps for most groups. The chapters are colour-coded for easy reference, and diagnostic features appear in bold type within the descriptions. Each chapter is written by a leading expert in the field. All the main plant and animal groups are covered: Lower invertebrates, Spiders and other arachnids, Insects, Freshwater fishes, Frogs, Reptiles, Birds, Mammals, Grasses, sedges, ferns and fungi, Wild flowers, Trees

Problems in Management of Locally Abundant Wild Mammals contains the proceedings of the Management of Locally Abundant Wild Mammals: A Workshop to Examine the Need for and Alternatives to the Culling of Wild Animals, held in Yarmouth Port, Massachusetts from September 29 to October 3, 1980. Contributors reexamine the scientific basis for possible management aimed at restraining local increase in numbers of locally abundant wild mammals, with emphasis on the issue of culling. This text is organized into six sections encompassing 19 chapters and begins with an overview of the dilemma of local overabundance or overpopulation of threatened mammals. In particular, it considers the extent to which past predictions have been fulfilled in practice, and whether understanding of the dynamics of living systems is adequate for useful prediction. This book also discusses the circumstances that allow a species to become so abundant and the adverse effects that arise. The chapters that follow present case studies that reflect experiences around the world concerning management of locally abundant mammals, including the white rhino in South Africa and deer in North America. This book also explores proposed solutions for problems involving the management of polar bear, the Northwest Atlantic humpback whale, and the British grey seal. This reference material is a valuable resource for zoologists, conservation biologists, and those with interest in the protection of wild mammals.
